1. Qualitative information regarding current quarter-term closing account

(1) Qualitative information regarding consolidated business results

With regard to Japanese economy in the first quarter of current fiscal period, apart partial suppression occurred from concerns about corporations production activities due to the Eastern Japan Great Earthquake from 11 March 2011 and to concerns towards stable power, uncertain situation is still continuing, due to the deterioration of consumer mindset and to the increasing influence of the reputational damage.

Also for the money lending industry, to which our Group is belonging, the severe business environment is continuing: business are shrinking or closing one after another, due to the market shrinkage subsequent to the complete implementation of the Modified Money lending Business Law, the increase of interest return requests, together with the worsening of capital making environment.

Concerning real-estate industry, although new house-building starts have slightly increased compared to the previous year, showing a steady tendency, real estate transactions are evolving weakly, as real estate prices tend to decline nationwide, the environment surrounding the industry is extremely severe and consumer confidence declined even further due to the earthquake.

Based on such business environment, in the current first quarter of the fiscal year, the Group developed toward overseas market by acquiring all shares of Neoline Loan Co. Ltd, which is a consumer-finance company in South Korea, and consolidating it as a subsidiary of the group. Korean consumer financing market has great advantages for business corporations including loan services, as maximum interest of 39% can be utilized, there are no payment problems and corporate tax ratio is lower than in Japan. Therefore the present development to Korea is not merely a business expansion towards Korean market, but is also our first step of overseas market development.

With regard to the credit guarantee business, we made efforts to accumulate the balance of debt guarantees, such as signing with Saikyoginko Inc. a new guarantee service contract with regard to collateralized-loans for business operators.

Also, on June 2nd, 2011, our Board of Directors Meeting decided to acquire the shares of KC Card Co Ltd (formerly Rakuten KC Co Ltd) from Rakuten Co Ltd, and to make it a consolidated subsidiary. Due to this, together with strengthening our business basis as a general financial corporation, in the future we will strive to enhance corporate value of the Group through participating the credit industry and strengthening of guarantee business.

As a result, for the 1st consolidated cumulative period, the operational gain is ¥3,774 million (15.6% decrease compared to the same term of the previous year), operational profit is ¥579 million (58.0% decrease compared to the same term of the previous year), ordinary profit is ¥586 million (57.7% decrease compared to the same term of the previous year) and net profit of the quarter is ¥377 million (58.8% decrease compared to the same term of the previous year).

Segment results are as below:

((1)) Credit business

(Credit services for business operators)

With regard to credit services for business operators, the main operator is Lopro Co. Ltd. As we are promoting commercial bill discounting as a long-term strategy within the financial business, loan balance of commercial credit is increasing. Also with regard with operational loans, although the amount decreased due to the influence of the complete implementation of the Money Lending Business Law amendment, it has increased due the consolidation of Lopro Co Ltd as a subsidiary.

As a result, with regard to finance balances at the end of the fiscal year second consolidated quarter, with ¥2,158 million by commercial bills (up 48.0 percent year on year), ¥2,338 million by loans (down 11.0% year on year). ¥30 million by long-term operating receivables (down 39.6% compared the same quarter the previous year), finance balance is now ¥4,526 million (down 25.2% compared to the prior year quarter), including long-term operating receivables.

(credit service for consumers)

With regard to credit service for consumers, the main operator are Lopro Co. Ltd and Saikyo Card Co Ltd.

With regard to finance balance at the end of the first quarter of the fiscal year, as a result of the fact that recovery went smoothly, with ¥8,348 million by operation loans (down 40.5% year on year) and 2,086 million by

long-term operating receivables yen (down 34.8% compared to the same quarter the previous year), the finance balance is totalling 10,434 million(decreased 39.4% compared to same period of the last year), including long-term operating receivables.

(consumer credit business)

With regard to consumer credit service, Lopro Co. Ltd and Saikyo Card Co Ltd perform consumer credit business by instalment sales.

With regard to instalment advance payment balance at the end of the first quarter of the fiscal year, as a result of the fact that recovery went smoothly, with ¥1,295 million by operation loans (down 59.4% year on year) and ¥42 million by long-term operating receivables yen (down 32.5% compared to the same quarter the previous year), the instalment advance payment balance is totalling 1,338 million(decreased 58.9% compared to same period of the last year), including long-term operating receivables.

(Credit guarantee service)

With regard to credit services for business operators, the main operator is Lopro Co. Ltd. We have been promoting the expansion of credit guarantee business as medium-to long-term strategy. We made efforts to accumulate debt guarantee balance, mainly for loans of Saikyoginko Co.Ltd. and Tokyo Star Bank.

As results, the balance of debt guarantees at the end of second consolidated quarter, with ¥ 6,465 million by guarantees for collateralized loans(up 145.5 percent year on year) and ¥ 4,649 million by unsecured loan guarantees (decreased by 14.6% compared to previous year), the balance of debt guaranteed has become ¥ 11,114 million (an increase of 37.6 percent compared to the same period of the last year).

(Debt purchase service)

With regard to receivable purchase services, our firm, Lopro Co, Ltd, Partir Receivable Collection Co. Ltd, United Partir and United Partir One are performing. Purchased receivable recovery is also evolving smoothly and had a great contribution to the operational income of the current first quarter consolidated cumulative period.

As medium-to long-term strategy, we are actively purchasing new receivables, but due to the fact that purchase cases are carefully selected, purchased receivable balance at the end of the first consolidated quarter was 3,355 million yen (a decrease of 33.7% the same quarter the previous year).

As a result, operating revenues in the money lending business is ¥3,054 million (down 15.1% compared with the same quarter the previous year), and segment profit is ¥730 million (down 41.5% compared with the same quarter the previous year).

((2)) Real estate business

With regard to the real estate business, we are developing business mainly by Keynote Co Ltd, and, while taking advantage of the synergy with finance business, we aim to generate revenue through housing related business, not only by sale or by brokerage of ready-built houses, but also by such as houses built on order or by second-hand house renovations.

As a result, operating revenues in the real estate business is 379 million (down 51.0% compared with the same quarter the previous year), and segment profit is 30 million yen (the segment gave ¥167 million profit on the same period of the previous year)..

((3)) Overseas business

With regard to overseas business, in Korea, Neoline Loan Co Ltd. has deployed consumer financing business. Starting from Seoul, South Korea, we aim to extend the loan balance steadily within the growing consumer finance market in Korea.

As a result, operating loans at the end of the first quarter consolidated accounting period were ¥ 4,390 million, operating revenue in overseas operations ¥ 413 million and segment profit was ¥ 45 million. As for the concerned consolidated subsidiary, due to the acquisition of shares in the first quarter consolidated accounting period, it does not compare to the prior year quarter.

((4)) Other businesses

With regard to other businesses, within J Trust System we are mainly developing Group's system and proceeding to computer operation and management work.

As a result, operating revenues in other business is ¥226 million (up 18.5% compared with the same quarter the previous year), and segment profit is ¥12 million (the segment gave ¥2million losses on the same quarter of the previous year).

(2) Qualitative information regarding consolidated financial situation

General assets at the end of the first consolidated accounting period grew by 177 million JPY compared to previous year consolidated accounting period, to 38,040 million JPY (0.5% growth compared to previous term). This is due mainly to the decrease of cash and deposits by ¥7,406 million within the first consolidated cumulative period on one hand, and on the other hand to the increase of operational loans by ¥3,350 million due to consolidating Neoline Credit Loan Co Ltd. as a subsidiary and to the increase of advances by ¥4,279 million following the acquisition of shares of KC Card Co. Ltd

With regard to debts, they are ¥23,869million (down 0.1% year-on-year), a decrease of ¥30 million compared to the end of the previous fiscal year.

This is mainly due to the increase of short-term borrowings by ¥1,286 million on one hand, and on the other hand to the decrease of payable corporate taxes by 973 million and to the decrease of the interest return loss allowances by 466 million.

With regard to net assets, they are ¥14,170 million (up 1.5% year-on-year), an increase of ¥208 million compared to the end of the previous fiscal year. This is mainly due on one hand to the decrease in retained earnings due primarily to paying ¥ 179 million dividends of surplus, and on the other hand to the recording of a net income of 377 million JPY for the quarter term.

As a result, net assets per share increased to ¥ 470.79, an increase of ¥ 6.01 from the end of the previous fiscal year, and the equity ratio increased by 0.3 points from 36.7% on the previous fiscal year-end, to become 37.0%.

(3) Qualitative information regarding consolidated result estimations

Together with participating credit-card business by taking advantage of our card business know-how, we will strive to enhance corporate value of the Group through strengthening and extending guarantee business by making effective use of our assets and our customer base.

Also, although we are believing that upon the acquisition of shares of KC Card Co Ltd a negative goodwill might occur as a special profit, the amount of influence on the current consolidated results is at present subject to examination and for the moment has not been confirmed.

Therefore, with regard to the consolidated result estimations for the second quarter consolidated cumulative period and through the March-ended 2012, there are no changes from the official declaration of May 12 2011.

2. Items regarding summary information (other)

(1) Transfers of most important subsidiaries within current quarter term consolidated cumulative period

For the first consolidated quarter cumulative accounting period, we acquired all the outstanding shares of Neoline Credit Loan Co Ltd, which is a consumer finance company in Korea and consolidated it as a subsidiary, and thus included it within the scope of consolidation.

(2) Additional information

On applying accounting criteria with regard to accounting changes and error corrections

Starting with the accounting changes and past error corrections made after the beginning of the first quarter consolidated accounting period, we are applying "Accounting Standards for Accounting Changes and Error Corrections" (Corporation Accounting Standards Nr. 24, December 4 2009), and "Guideline on Accounting Standards for correction of errors and accounting changes" (Corporation Accounting Standards Application Guideline, Nr. 24, December 4 2009).
